Meanders of the Colorado River, Pages 81 to 94

## Township 21 South, Range 24 East

## CHAINS

The Fourth Standard Parallel South along the south boundary of T. 20 S., R. 24 E. was surveyed by A. D. Ferron in 1884; resurveyed by H. D. Page in 1902 and retraced by Howard W. Miller in 1910, and the record appears in the field notes of the Fourth Standard Parallel South, Range 24 East. The west boundary (Grand River Guide Meridian), was surveyed by E. Beuttner in 1880; resurveyed by A. D. Ferron in 1884 and by H. D. Page in 1902, and concurrently resurveyed by Glen B. Hatch, under this group, and the record appears in the 1964 field notes of Township 21 South, Range 23 East. The south boundary was surveyed by H. D. Page in 1902, and retraced and resurveyed by Howard W. Miller in 1911, and the record appears in the field notes of Township 22 South, Range 24 East. The south  $1\frac{1}{2}$  miles and the north 3 miles of the east boundary were surveyed by H. D. Page in 1902, and the remaining portion surveyed by Howard W. Miller in 1910, who resurveyed the south  $1\frac{1}{2}$  miles and retraced the north 3 miles the same year, and the record appears in the field notes of Township 21 South, Range 25 East. All sections except section 24 and portions of sections 23 and 25, were surveyed by H. D. Page in 1902. The remaining lines were surveyed, and the lines adjoining the 1902 survey were retraced by Howard W. Miller in 1910, and the record appears in the field notes of Township 21 South, Range 24 East.

The following field notes are those of the dependent resurvey of the Fourth Standard Parallel South, along the south boundary of Township 20 South, Range 24 East, the dependent resurvey of a portion of the subdivisional lines, and the retracement of a portion of the subdivisional lines in Township 21 South, Range 24 East, the establishment of the west  $1/4$  section corners for sections 6, 7 and 18, Township 21 South, Range 25 East, on the east boundary of Township 21 South, Range 24 East, and the meanders of the Colorado River (previously known as the Grand River) in Township 21 South, Range 24 East. The present river banks are meandered as a basis for new lottings and areas of vacant lands bordering the river. Informative traverse lines are surveyed along non-public lands bordering the river, for topographic purposes only.

The survey was executed in accordance with the specifications as set forth in the Manual of Surveying Instructions, 1947, and special instructions dated September 21, 1962.

Before restoring the corners, the lines of the original survey were retraced and diligent search made for any evidence of the original corners, or other calls of the original field note record.

The rules of proportionate measurement were applied to ascertain the position of the lost corners, but not until exhausting every reasonable possibility of finding direct evidence for the control of each particular corner.

## Township 21 South, Range 24 East

## CHAINS

All lines of this survey were run by direct method where the lines were accessible; lines inaccessible were run by triangulation or traverse methods. Distances to topography on lines run by triangulation or traverse are approximately as scaled from reliable U.S.G.S. topographic sheets. The details of such triangulations or traverses have been thoroughly checked and verified, and in order to simplify the record, the diagrams and reductions are omitted from these field notes.

The direction of the lines of this survey were determined by reference to true meridians established on line by altitude observations on the sun. The lines were carried forward by sustained angulation being supplemented by other altitude observations on the sun taken throughout the progress of the survey.

The geographic position for the southeast corner of the township is at Latitude  $38^{\circ} 55' 44.4''$  N. and Longitude  $109^{\circ} 12' 07.3''$  W., which is the mean of section line ties to U.S.C. and G.S. triangulation stations "Cisco" at Latitude  $38^{\circ} 57' 33.828''$  N. and Longitude  $109^{\circ} 18' 08.106''$  W., located N.  $46^{\circ} 26' E.$ , 11.41 chs. dist. from the 1/4 section corner of sections 19 and 30 and "G.L.O. station 6, Utah," at Latitude  $39^{\circ} 00' 57.614''$  N. and Longitude  $109^{\circ} 18' 45.917''$  W., which is common with the northwest corner of the township.

The magnetic declination was read at several stations throughout the township and the average of these readings was found to be  $15^{\circ}$  East.

Dependent Resurvey of the Fourth Standard Parallel South along the South Boundary of Township 20 South, Range 24 East.

Reestablishment of the Survey Executed by A. D. Ferron in 1884, Resurveyed by H. D. Page in 1902 and Retracted by Howard W. Miller in 1910.

---

Beginning at the standard cor. of T. 20 S., Rs. 24 and 25 E., monumented with an iron post, 3 ins. diam., set and mkd. as described in the official record.

N.  $89^{\circ} 55' W.$ , along the S. bdy. of sec. 36.

Over gently rolling desert land through shadscale and black brush undergrowth; desc. 40 ft. over gentle W. slope.

3.20 The closing cor. of T. 21 S., Rs. 24 and 25 E., monumented with an iron post, 2 ins. diam., set and mkd. as described in the official record.

12.20 Wash, 10 lks. wide, 1 ft. deep, drains S.  $20^{\circ} W.$ ; asc. 5 ft. over SE. slope.

General Description

Township 21 South, Range 24 East, is located about 1/2 mile east of Cisco, Utah. The western portion of the township is mostly rolling desert land with clay soil and shadscale undergrowth. The eastern portion is rolling to broken desert mountains with rocky, sandy clay soil with scattered juniper timber and shadscale undergrowth, with cottonwood timber and willows along the Colorado River, which enters the township at the southeast corner of section 24, and flows through sections 24, 23, 14, 15, 22, 26, 27 and 35, leaving the township at the south 1/4 section cor. of section 35. The water supply for Cisco is located in the southeast portion of section 19, and is stale alkaline water used for watering purposes only. There is a small spring or seep, located in the southwest 1/4 of the northwest 1/4 of section 28. No other water was noted in the township, other than the river. The elevation varies from 4,200 ft. above sea level along the Colorado River, to 4,700 ft. above sea level along the east boundary of section 25, which is the highest portion of the township. The only habitation in the township is a ranch house located in section 26. The Denver and Rio Grande Western Railroad enters the township at the southwest corner of section 18, and bears northeasterly through sections 18, 17, 16, 9, 4 and 3, leaving the township at the northeast corner of section 3. U. S. Highway 50 and 6 enters the township at the northwest corner of section 19, and bears northerly through sections 18, 7, 8 and 5, leaving the township 13.27 chs. west of the north 1/4 section corner of section 5. The El Paso underground gas line enters the township at the west boundary of section 19, and bears northeasterly through sections 19, 18, 17, 8 and leaves the township 3.00 chs. west of the closing corner of sections 4 and 5, on the north boundary. There are several trail roads throughout the township, and two improved roads from Cisco to the Colorado River.

CERTIFICATE OF SURVEY

L. Glen B. Hatch

, HEREBY CERTIFY upon honor that,

in pursuance of special instructions bearing date of the 21st day of September . 19 62.  
and supplemental special instructions dated August 24, 1966.

I have dependently resurveyed the South Boundary (Fourth Standard Parallel South) of T. 20 S., R. 24 E., a portion of the subdivisional lines and retraced a portion of the subdivisional lines of T. 21 S., R. 24 E., and established the W. 1/4 sec. cors. for secs. 6, 7 and 18, T. 21 S., R. 25 E., on the E. bdy. of T. 21 S., R. 24 E.

of the Salt Lake Meridian, in the State of Utah , which

are represented in the foregoing field notes as having been executed by me and under my direction;  
and that said survey has been made in strict conformity with said special instructions, the Manual of Instructions for the Survey of the Public Lands of the United States, and in specific manner described in the foregoing field notes.

November 8, 1966

Meanders of the Colorado River - Pages 12 and 13

Dependent Resurvey, Portion of the Subdivision and East Boundary, Township 20 South, Range 26 East

CHAINS

The north boundary was surveyed by Frank E. Baxter in 1894, and resurveyed by Glen B. Hatch in 1963, and the record appears in the resurvey of the south boundary of T. 19 S., R. 26 E. The north 4 miles of the west boundary were surveyed by Frank E. Baxter in 1894, and resurveyed by Glen B. Hatch in 1963, and the record appears in the resurvey of a portion of the east boundary of T. 20 S., R. 25 E. The south 2 miles of the west boundary were surveyed by H. W. Miller in 1910. The south boundary was surveyed by H. W. Miller in 1910. The east boundary (the Utah and Colorado State Line between mile post 139 and 145) was surveyed by J. R. Reeves in 1879, and resurveyed by A. D. Wilson in 1885. The 4 miles between mile posts 140 and 144 were resurveyed by H. W. Miller in 1910. The northwest portion of the subdivisional lines were surveyed by Frank E. Baxter in 1894, and a portion of these lines retraced by H. W. Miller in 1910. The southeast portion of the subdivisional lines were surveyed by H. W. Miller in 1910.

The following field notes are those of a dependent resurvey of a portion of the subdivisional lines, and retracement of the Utah and Colorado State Line between mile posts 144 and 145.

The survey was executed in accordance with the specifications as set forth in the Manual of Instructions, 1947 and the Special Instructions dated May 28, 1964.

Corners on the east-west lines were set on the true latitudinal curve. Lines connecting previously established corners were run by random and true methods, but for simplification of the record, the random lines are omitted from these field notes.

All lines of this survey were run by direct method where lines were accessible; lines inaccessible were run by traverse or triangulation method. Distances to topography on lines run by traverse and triangulation methods are approximately as scaled from U.S.G.S. topographic sheets. The details of such traverses and triangulations have been thoroughly checked and verified, and in order to simplify the records, the diagrams and reductions are omitted from these field notes.

The direction of the lines of this survey were determined by reference to true meridians established on line by altitude observations on the sun. The lines were carried forward by sustained angulations being supplemented by other numerous latitude observations on the sun taken throughout the progress of the survey.

Before restoring lost corners, the lines of the original survey were retraced and a diligent search made for any evidence of the original corners. The rules of proportionate measurement were applied to ascertain the position of the lost corner after every reasonable possibility of finding direct evidence of the corner had been exhausted.

Dependent Resurvey, Portion of the Subdivision and  
East Boundary, Township 20 South, Range 26 East

## CHAINS

The geographic position for the southeast corner of sec. 19 is in Latitude  $39^{\circ} 02' 43''$  N. and Longitude  $109^{\circ} 05' 12''$  W., as scaled from U.S.G.S. topographic sheet Westwater 4 SE., Utah-Colo.

The magnetic declination was read at a number of stations throughout the township and the average of the several readings was found to be  $15^{\circ} 15'$  E.

Retracement of the Resurvey Executed by  
A. D. Wilson, Deputy Surveyor, in 1885.

Beginning at the 144 mile post, on the Utah and Colorado State Boundary, marked by a sandstone  $3 \times 10 \times 18$  ins., in a mound of stone, marked Utah 144 M on the west face and Colorado on the east face.

N.  $0^{\circ} 16'$  E., along the Utah and Colorado State Boundary.

Over broken desert land, covered with scattered juniper; asc. 15 ft. over gentle SW. slope.

1.90 The closing cor. of secs. 4 and 8, hereinafter described; desc. 25 ft. along gentle W. slope.

13.50 Wash, 6 ft. deep, 10 lks. wide, drains W.; asc. 10 ft. along gentle W. slope.

21.40 Leave juniper; desc. 55 ft. along gentle W. slope covered with sagebrush.

35.70 Small wash, drains W.

80.83 The 145 mile post on the Utah and Colorado State Boundary, marked by an iron post,  $2\frac{1}{2}$  ins. diam., set, mkd. and witnessed as described in the resurvey of the E. bdy. of T. 19 S., R. 26 E. in 1963.

From this mile post the closing cor. of Tps. 19 and 20 S., R. 26 E., bears N.  $0^{\circ} 47'$  E., 3.33 chs. dist., marked by an iron post,  $2\frac{1}{2}$  ins. diam., set, mkd. and witnessed as described in the resurvey of the S. bdy. of T. 19 S., R. 26 E., in 1963.

Land, broken.  
Soil, gravelly with exposed sandstone.  
Timber, scattered juniper on S. portion.  
Undergrowth, sagebrush.

Dependent Resurvey, Portion of the Subdivisional  
Lines, T. 20 S., R. 26 E., Salt Lake Meridian, Utah

Reestablishment of the Survey Executed by  
Frank E. Baxter, Deputy Surveyor in 1894

## Dependent Resurvey, Portion, T. 20 S., R. 26 E.

## CHAINS

The cor. of secs. 4 and 5, is determined by a sandstone 4x14x20 ins., plainly mkd. 5 notches on S. and 4 notches on E. face, and set in a mound of stone.

At the corner point

Set an iron post 30 ins. long,  $2\frac{1}{2}$  ins. diam., 15 ins. in the ground, to bedrock, in a mound of stone 4 ft. base, to top, with brass cap mkd.

General Description

The portion of T. 20 S., R. 26 E., covered by this  
survey consists of broken desert land draining westward  
to the Colorado River. The East Boundary of the town-  
ship is formed by the Utah and Colorado State Boundary  
between mile post 139 and 145. The main vegetation on  
the township consists of scattered pinon and juniper,  
with sagebrush undergrowth. The soil is gravelly with  
exposed sandstone rims. No water was noted during the  
survey. The elevation varies from about 4,320 to 5,850  
ft. above sea level. Access to the township is by hard  
surface and dirt road from Fruita, Colorado. There are  
no habitations in the township.

## CERTIFICATE OF SURVEY

I, Craig P. Sylvester

, HEREBY CERTIFY upon honor that,

in pursuance of special instructions bearing date of the 28th day of May, 1964, and supplemental special instructions dated September 22, 1966 I have retraced a portion of the East Boundary (Utah-Colorado State Boundary) and dependently resurveyed a portion of the subdivisional lines and traverse the present banks of the Colorado River in Sec. 6 of Township 20 South, Range 26 East

of the Salt Lake Meridian, in the State of Utah, which are represented in the foregoing field notes as having been executed by me and under my direction; and that said survey has been made in strict conformity with said special instructions, the Manual of Instructions for the Survey of the Public Lands of the United States, and in specific manner described in the foregoing field notes.

November 22, 1966

## Dependent Resurvey of T. 11 N., R. 12 W., Salt Lake Meridian

## CHAINS

The west 4 miles of the south boundary of T. 12 N., R. 12 W., were surveyed by G. V. M. Boutelle in 1872, the east 2 miles of this boundary were surveyed by Joseph Gorlinski in 1872 and the entire boundary was resurveyed by H. Fitzhugh in 1883. The south, west and east boundaries of T. 11 N., R. 12 W. were surveyed by H. Fitzhugh in 1883 and the subdivisional lines of T. 11 N., R. 12 W. were surveyed by E. W. Koeber in 1887. The following field notes are those of a dependent resurvey of the S. bdy. of T. 12 N., R. 12 W., the dependent resurvey of the S., W. and E. bdys. and the subdivisional lines of T. 11 N., R. 12 W.

The resurvey was initiated on the official request of the District Manager, Salt Lake District, Bureau of Land Mangement, because of the multiple use and the intermingled land pattern.

The survey was executed in accordance with the specifications as set forth in the manual of surveying instructions 1947, and the special instructions dated February 20, 1967.

Before restoring the corners, the lines of the original survey were retraced and a diligent search made for any evidence of the original corners and any calls of the original field note record. When duly identified, the corner positions were remonumented.

The rules of proportionate measurement were applied in order to ascertain the position of lost corners, after completing the necessary retracements to connect with the identified corner locations, but not until exhausting every reasonable possibility of finding direct evidence for the control of each particular corner.

The direction of the lines of this survey were determined by the solar transit method.

The length of the lines were determined by chaining.

The geographic position for the southeast corner of the township is at Latitude  $41^{\circ} 37' 46.3''$  N. and Longitude  $113^{\circ} 09' 13.1''$  W., as computed from section line ties made to U.S.G.S. triangulation station Kelton, at Latitude  $41^{\circ} 41' 44.245''$  N. and Longitude  $113^{\circ} 15' 03.263''$  W., located N.  $47^{\circ} 41'$  E.,  $6.87$  chs. distance from the  $1/4$  sec. cor. of secs. 7 and 8, T. 11 N., R. 12 W.

Corrected show  
distance in  
field notes

The magnetic declination was read at a number of stations throughout the survey and the average of the several readings was found to be N.  $17^{\circ} 15'$  E.

Dependent Resurvey of the South  
Boundary, T. 11 N., R. 12 W.

Reestablishment of the Survey Executed by  
H. Fitzhugh, Deputy Surveyor in 1883.

Undergrowth, medium dense shadscale, sagebrush, scant grass.

General Description

The general elevation of Township 11 North, Range 12 West, varies from about 4,300 ft. above sea level at the SE. cor. of the Tp. to about 5,500 ft. above sea level in the NW. portion of the Tp. The soil is a sandy clay in the lower elevations which are nearly level, to a rocky, sandy clay, on the desert hills. A widely scattered growth of scrub juniper is found on the hills in the NW. portion of the Tp. The undergrowth is mainly sagebrush and shadscale with lesser amounts of greasewood, grass and weeds. There are no permanent habitations in the township and no water was noted. The township is accessible from an improved dirt road, from Kelton to Rosebud which enters the township about 20.00 chs. S. of the NE. cor. of the township and leaves the township about 8.00 chs. N. of the cor. of secs. 19, 24, 25 and 30 on the W. bdy. There are numerous trail roads throughout the Tp.

# CERTIFICATE OF SURVEY

I, Fred R. Chappell

, HEREBY CERTIFY upon honor that,

in pursuance of special instructions bearing date of the 20th day of February, 19 67,

I have dependently resurveyed the South Boundary of Township 12 North, Range 12 West and the South, West and East Boundaries and the subdivisional lines of Township 11 North, Range 12 West

of the Salt Lake Meridian, in the State of Utah, which are represented in the foregoing field notes as having been executed by me and under my direction; and that said survey has been made in strict conformity with said special instructions, the Manual of Instructions for the Survey of the Public Lands of the United States, and in specific manner described in the foregoing field notes.

# Dependent Resurvey of T. 11 N., R. 13 W., Salt Lake Meridian

## CHAINS

The south boundary of T. 12 N., R. 13 W. was surveyed by G.V.M. Boutelle, in 1872 and was resurveyed by H. Fitzhugh in 1883. The southwest and east boundaries of T. 11 N., R. 13 W. were surveyed by H. Fitzhugh in 1883. The subdivisional lines of T. 11 N., R. 13 W. were surveyed by H. Fitzhugh in 1884. The following field notes are those of a dependent resurvey of the S. bdy. of T. 12 N., R. 13 W. The S. and W. bdys. and the subdivisional lines of T. 11 N., R. 13 W., the E. bdy. of T. 11 N., R. 13 W. are being concurrently resurveyed under this same group and its record appears as the W. bdy. of T. 11 N., R. 12 W.

The survey was initiated on the official request of the district manager, Salt Lake District, Bureau of Land Management because of the multiple use and the intermingled land pattern.

The survey was executed in accordance with the specifications as set forth in the Manual of Surveying Instructions 1947, and the special instructions dated February 20, 1967.

Before restoring the corners, the lines of the original survey were retraced and a diligent search made for any evidence of the original corners and any calls of the original field note record. When duly identified, the corner positions were remonumented.

The rules of proportionate measurement were applied in order to ascertain the position of lost corners after completing the necessary retracements to connect with the identified corner locations, but not until exhausting every reasonable possibility of finding direct evidence for the control of each particular corner.

The direction of the lines of this survey were determined by the solar transit method.

The length of the lines were determined by chaining.

The geographic position for the southeast corner of the township is at Latitude  $41^{\circ} 37' 43.3''$  N. and Longitude  $113^{\circ} 16' 11.2''$  W., as computed from section line ties made to U.S.G.S. triangulation station Kelton, at Latitude  $41^{\circ} 41' 44.245''$  N. and Longitude  $113^{\circ} 15' 03.263''$  W., located N.  $17^{\circ} 11' E.$ ,  $6.87$  chs. distance from the  $1/4$  sec. cor. of secs. 7 and 8, T. 11 N., R. 12 W.

*Corrections shown  
herein are in  
accordance with  
field findings*

The magnetic declination was read at a number of stations throughout the survey and the average of the several readings was found to be N.  $17^{\circ} 15' E.$

Reestablishment of the Survey Executed  
by H. Fitzhugh, Deputy Surveyor in 1883.

## Dependent Resurvey, T. 11 N., R. 13 W.

CHAINS

General Description

The general elevation of Township 11 N., R. 13 W., varies from about 5,600 ft. above sea level on the hills in the SW. portion of the township to about 4,800 ft. above sea level in the nearly level land in the SE. and northern portion of the township. The soil is mostly a sandy clay in the lower elevations, to a rocky clay on the desert hills. A widely scattered growth of scrub juniper is found in the higher elevations. The undergrowth is mainly sagebrush and shadscale with lesser amounts of greasewood, grass and weeds. There are no permanent habitations in the township and no water was noted. The township is accessible from an improved dirt road, from Kelton to Rosebud, which enters the township near the cor. of secs. 19, 24, 25 and 30, on the E. bdy., and leaves the township near the cor. of secs. 25, 30, 31 and 36, on the W. bdy., and by numerous trail roads.

CERTIFICATE OF SURVEY

I, Fred R. Chappell, HEREBY CERTIFY upon honor that,  
in pursuance of special instructions bearing date of the 20 day of February, 1967,  
I have dependently resurveyed the South Boundary of Township 12 North, Range  
13 West and dependently resurveyed the South and West Boundaries and the  
subdivisional lines of Township 11 North, Range 13 West.

of the Salt Lake Meridian, in the State of Utah, which  
are represented in the foregoing field notes as having been executed by me and under my direction;  
and that said survey has been made in strict conformity with said special instructions, the Manual  
of Instructions for the Survey of the Public Lands of the United States, and in specific manner  
described in the foregoing field notes.

## Township 33 South, Range 3 West

## CHAINS

The east boundary, a portion of the south boundary and a portion of the subdivisional lines were surveyed by T. C. Bailey and J. G. Burrill in 1876. The east boundary of section 1 was retraced by E. Bunbury in 1913.

The following field notes are those of the resurvey of a portion of the east boundary and a portion of the subdivisional lines and of the survey of a portion of the north boundary and a portion of the subdivisional lines of Township 33 South, Range 3 West.

Before restoring the lost corners, the lines were retraced and a diligent search was made for any evidence of the original corners and other calls of the field note record. After completing the necessary retracements, rules of proportionate measurement were applied in order to ascertain the position of the lost corners.

The directions of the lines were determined by solar observations and carried forward by sustained angulation.

The lengths of the lines were determined by chaining where the lines were accessible; inaccessible lines were run by traverse or triangulation methods. Distances to topography on lines run by traverse or triangulation methods are approximate as scaled from U. S. Forest Service Planimetric Map Adams Head 1. The details of such traverse and triangulations have been thoroughly checked and verified and in order to simplify the record, the diagrams and reductions are omitted from these field notes.

The geographic position of the southeast corner of section 13 is at Latitude 37° 55' 42" N. and Longitude 112° 03' 25" W., as scaled from U. S. Forest Service Planimetric Map, Adams Head 1, Utah.

Dependent Resurvey of a Portion of the  
East Boundary, T. 33 S., R. 3 W.

Reestablishment of the Survey Executed  
by Bailey and Burrill in 1876.

Beginning at the cor. of secs. 13, 18, 19 and 24 on the E. bdy. of the Tp., which is a trachyte stone, 12x8x6 ins. (record 13x9x6 ins.), firmly set and dimly mkd. as described in the official record.

At the cor. point

Set an iron post, 30 ins. long, 2½ ins. diam., 20 ins. in the ground and in a mound of stone to brass cap mkd.

Dependent Resurvey of a Portion of  
the East Boundary of T. 33 S., R. 3 W.

[illegible]

# CERTIFICATE OF SURVEY

I, **Woodrow H. Sylvester**

, HEREBY CERTIFY upon honor that,

in pursuance of special instructions bearing date of the 31st day of **May**, 19 **67**,

I have supervised the resurvey of a portion of the East Boundary and a portion of the subdivisional lines and surveyed a portion of the North Boundary and a portion of the subdivisional lines of T. 33 S., R. 3 W.

of the **Salt Lake** Meridian, in the State of **Utah**, which

are represented in the foregoing field notes as having been executed ~~RECORDED~~ under my direction;

and that said survey has been made in strict conformity with said special instructions, the Manual

of Instructions for the Survey of the Public Lands of the United States, and in specific manner

described in the foregoing field notes.

July 17, 1968

Date:

*Woodrow H. Sylvester*

SUPERVISORY

Date:

(Cadastral Surveyor)

## CERTIFICATE OF APPROVAL

SUBMITTED FOR APPROVAL

Date AUG 13 1968

BUREAU OF LAND MANAGEMENT,  
Washington, D. C.

The foregoing field notes of the dependent resurvey of a portion of the East Boundary and a portion of the subdivisional lines, and of the survey of a portion of East Boundary and a portion of the subdivisional lines of T. 33 S., R. 3 W. the Salt Lake Meridian, Utah

executed by Gerald W. Hochstrasser, under the supervision of Woodrow H. Sylvester Supervisory Cadastral Surveyor

having been critically examined and found correct, are hereby approved.

FEB 14 1969

Date:

*Clark L. Hansen*  
Chief, Division of Cadastral Survey

## CERTIFICATE OF TRANSCRIPT

~~I certify that the foregoing transcript of the field notes of the above-described surveys is~~  
~~is a true copy of the original field notes.~~

## Dependent Resurvey, Township 11 South, Range 5 West

## CHAINS

The North Boundary (Second Standard Parallel South) was surveyed by Joseph Gorlinski in 1872 and a portion was retraced by John R. Stewart and Robert E. Clark in 1913 and a portion was retraced by Howard W. Miller and Isaac Hayes in 1915. The East Boundary was surveyed by Joseph Gorlinski in 1874. The South Boundary was surveyed by Joseph Gorlinski in 1872 and a portion retraced by John R. Stewart and Robert E. Clark in 1913. The West Boundary was surveyed by Joseph Gorlinski in 1872 and concurrently resurveyed by Gerald W. Hochstrasser in 1966. Portions of the subdivision were surveyed by Joseph Gorlinski in 1872 and 1874. In 1913, John R. Stewart and Robert E. Clark surveyed a portion of the subdivision and retraced or resurveyed a portion. The following field notes are those of the dependent resurvey of a portion of the Second Standard Parallel South (South Boundary, Township 10 South, Range 5 West), the dependent resurvey of a portion of the South Boundary, Township 11 South, Range 5 West, and the dependent resurvey and retracement of a portion of the subdivisional lines of Township 11 South, Range 5 West.

The survey was conducted in accordance with the specifications as set forth in the Manual of Surveying Instructions, 1947, and special instructions dated May 18, 1965.

Before restoring the corners the lines of the original survey were retraced and diligent search made for any evidence of the original corners, bearing trees or other calls of the original field note record.

The rules of proportionate measurement were applied to ascertain the position of the lost corners, but not until exhausting every reasonable possibility of finding direct evidence for the control of each particular corner.

The direction of the lines of this survey were determined by reference to true meridians established on line by hour angle observations on Polaris. The lines were carried forward by sustained angulation being supplemented by other hour angle observations on Polaris.

The geographic position for the southeast corner of section 31 is at Latitude  $39^{\circ} 49' 00''$  N. and Longitude  $112^{\circ} 26' 27''$  W., as computed from the southeast corner of Township 11 South, Range 6 West.

The magnetic declination was read at several stations throughout the township and the average of these readings was found to be  $16^{\circ} 30'$  East.

Dependent Resurvey of a Portion of the Second Standard Parallel South (S. Bdy., T. 10 S., R. 5 W.).

Reestablishment of the Survey Executed by Joseph Gorlinski in 1872 and the Retracement Executed by Howard W. Miller and Isaac Hayes in 1915.

Dependent Resurvey of a Portion of the Second Standard  
Parallel South (S. Bdy., T. 10 S. R. 5 W.)

CHAINS

Beginning at the original standard cor. of secs. 31 and 32, T. 10 S., R. 5 W., which was remarked to bean angle point only in the 1915 retracement, monumented with a limestone, 24x12x8 ins., firmly set and plainly mkd. SC on N. face and AP on top.

Thence,

N. 89° 57' W., along the S. bdy. of sec. 31.

Over mountainous land through sagebrush undergrowth; desc. 30 ft. over W. slope.

2.65 The closing cor. of secs. 5 and 6, T. 11 S., R. 5 W., monumented with an iron post, 2 ins. diam., set, mkd. and witnessed as described in the official record of the 1913 survey of T. 11 S., R. 5 W.

Desc. 735 ft. over steep W. slope.

39.76 The standard 1/4 sec. cor. of sec. 31, monumented with a limestone, 18x8x8 ins., firmly set and plainly mkd. 1/4 on N. face, and witnessed by a mound of stone to N.

At the cor. point

Set an iron post, 30 ins. long, 2½ ins. diam., 24 ins. in the ground, with brass cap mkd.

the Tp., monumented with an iron post, 2 ins. diam.,  
hereinbefore described.

Land, mountainous.

Soil, clay loam.

Timber, scattered juniper.

Undergrowth, sagebrush.

#### General Description

That portion of the township surveyed at this time is  
mountainous land covered with a dense growth of juniper  
timber with sagebrush undergrowth. The area is drained  
in a southwesterly direction by numerous small draws and  
washes. The soil is mostly clay loam. Two trail roads  
were noted, one is in sections 19 and 30 and one in  
sections 6 and 7. The elevation varies from about  
5,500 ft. in the southwest corner to about 6,700 ft.  
above sea level in the north portion. A small stream  
of water was noted in the northwest portion of section  
6.

## CERTIFICATE OF SURVEY

I, Glen B. Hatch

, HEREBY CERTIFY upon honor that,

in pursuance of special instructions bearing date of the 18th day of May, 1965,

I have dependently resurveyed a portion of the Second Standard Parallel South (South Boundary of Township 10 South, Range 5 West) and a portion of the South Boundary of Township 11 South, Range 5 West, and dependently resurveyed and retraced a portion of the subdivisional lines of Township 11 South, Range 5 West

of the Salt Lake Meridian, in the State of Utah, which are represented in the foregoing field notes as having been executed by me and under my direction; and that said survey has been made in strict conformity with said special instructions, the Manual of Instructions for the Survey of the Public Lands of the United States, and in specific manner described in the foregoing field notes.

February 1, 1968  
(Date)

*Glen B. Hatch*

## CERTIFICATE OF APPROVAL

SUBMITTED FOR APPROVAL

Date AUG 23 1968

BUREAU OF LAND MANAGEMENT,  
Washington, D. C.

The foregoing field notes of the dependent resurvey of a portion of the Second Standard Parallel South (South Boundary of Township 10 South, Range 5 West, and a portion of the South Boundary of Township 11 South, Range 5 West, and the dependent resurvey and retracement of a portion of the subdivisional lines of Township 11 South, Range 5 West, of the Salt Lake Meridian in the State of Utah

executed by Glen B. Hatch, Supervisory Cadastral Surveyor

having been critically examined and found correct, are hereby approved.

FEB 24 1969  
(Date)

*Clark I. Humm*  
(Chief, Division of Engineering)

Cadastral Survey

## CERTIFICATE OF TRANSCRIPT

The foregoing field notes of the dependent resurvey of a portion of the Second Standard Parallel South (South Boundary of Township 10 South, Range 5 West, and a portion of the South Boundary of Township 11 South, Range 5 West, and the dependent resurvey and retracement of a portion of the subdivisional lines of Township 11 South, Range 5 West, of the Salt Lake Meridian in the State of Utah

, is a true copy of the original field notes.

## Dependent Resurvey, Township 42 South, Range 16 West

CHAINS

The east 2 miles of the south boundary, the south  $3\frac{1}{2}$  miles of the east boundary, the west 4 miles of the north boundary, the north 1 mile of the west boundary and a portion of the subdivisional lines were surveyed by Joseph Gorkinski in 1870. The east 2 miles of the north boundary were surveyed by Julian Bausman in 1870. The north  $2\frac{1}{2}$  miles of the east boundary were surveyed and a portion resurveyed by T. C. Bailey and J. G. Burrill in 1877. The east 2 miles of the south boundary were resurveyed and the west 4 miles surveyed by Washington Jenkins and Joseph A. West in 1897. In 1900, Mayhew H. Dalley resurveyed the south boundary, the east boundary (Pine Valley Guide Meridian), the north boundary, the north 1 mile of the west boundary, and a portion of the subdivisional lines, and surveyed the south 5 miles of the west boundary and completed the survey of the subdivisional lines. The west boundary was retraced by J. H. Winwood and H. L. Chamberlain in 1909. The north boundary was retraced by Ralph Gentry in 1912. The following field notes are those of the dependent resurvey of the north and west boundaries, a portion of the south and east boundaries and a portion of the subdivisional lines of Township 42 South, Range 16 West.

Before restoring the corners, the lines of the original survey were retraced and diligent search made for any evidence of the original corners or other calls of the original field note record.

The rules of proportionate measurement were applied to ascertain the position of the lost corners, but not until exhausting every reasonable possibility of finding direct evidence for the control of each particular corner.

The lines of this survey were determined by reference to true meridians established on line by hour angle observations on Polaris. The lines were carried forward by sustained angulation being supplemented by other hour angle observations on Polaris taken throughout the progress of the survey.

The lines of this survey were run by direct method where the lines were accessible; lines inaccessible were run by triangulation method. The details of such triangulations were thoroughly checked and verified and in order to simplify the record the details of such triangulations are omitted from these field notes. Topography on lines run by triangulation methods are scaled from U.S.G.S. topographic quadrangle "St. George, Utah."

The geographic position at the  $\frac{1}{2}$  sec. cor. of secs. 1 and 36 on the south boundary of the township is at Latitude  $37^{\circ} 04' 51.73''$  N. and Longitude  $113^{\circ} 35' 41.17''$  W. as computed from U.S.C. & G.S. triangulation station "St. George Airport," Latitude  $37^{\circ} 05' 26.126''$  N., Longitude  $113^{\circ} 35' 25.419''$  W., located N.  $20^{\circ} 08' 55''$  E., 56.15 chs. dist.

The magnetic declination was read at several stations throughout the township and the average of these readings was found to be  $15^{\circ} 45'$  East.

Dependent Resurvey of a Portion of the S. Bdy.,  
T. 42 S., R. 16 W.

## Dependent Resurvey, Township 42 South, Range 16 West

Reestablishment of the Survey Executed by Joseph Gorlinski in 1870 and the Resurveys Executed by Washington Jenkins and Joseph A. West in 1897 and Mayhew H. Dalley in 1900.

Beginning at the  $\frac{1}{2}$  sec. cor. of secs. 1 and 36, on the S. bdy. of the Tp., monumented with a lava stone, 30x24x12 ins., firmly set and plainly mkd.  $\frac{1}{2}$  on N. face.

At the cor. point

Set an iron post, 30 ins. long,  $2\frac{1}{2}$  ins. diam., 4 ins. in the ground to bedrock, and in a mound of stone, 5 ft. base to top, with brass cap mkd.

T42S R16W

$\frac{1}{2}$   $\frac{S36}{S1}$

T43S R16W

1968

Bury original stone cor. in mound of stone alongside iron post.

From this cor., U.S.C. & G.S. triangulation station "St. George Airport," bears N.  $20^{\circ} 08' 55''$  E., 56.15 chs. dist., in Latitude  $37^{\circ} 05' 26.126''$  N., Longitude  $113^{\circ} 35' 25.419''$  W.

Thence

S.  $89^{\circ} 13'$  W., bet. sec. 1 and 36.

Over mountainous land through blackbrush and cacti undergrowth; desc. 80 ft. over SW. slope.

- 6.15 Improved gravel road to St. George, bears N.  $15^{\circ}$  W. and S.  $15^{\circ}$  E., curving SE.; thence over nearly level land.
- 11.15 St. George Canal, 10 lks. wide, 3 ft. deep, flows S.  $40^{\circ}$  E.; enter farm land.
- 15.65 Santa Clara River, 20 lks. wide, 2 ft. deep, flows S.  $30^{\circ}$  E., continue over farm land.
- 40.94 Point for the cor. of secs. 1, 2, 35 and 36 at proportionate bearing and dist., falls on cultivated land and is not monumented. There is no remaining evidence of the original cor.

Point selected for the witness cor. of secs. 1, 2, 35 and 36, bears S.  $1^{\circ} 01'$  E., ~~1.22~~ <sup>1.82</sup> chs. dist.

Set an iron post, 30 ins. long,  $2\frac{1}{2}$  ins. diam., 24 ins. in the ground, with brass cap mkd.

Subdivision, T. 42 S., R. 16 W.

## CHAINS

Land, gently rolling.  
Soil, rocky, shallow loam.  
No timber.  
Undergrowth, blackbrush and mesquite.

Reestablishment of the Survey Executed by Joseph  
Gorlinski in 1870 and the Resurvey Executed by  
Mayhew H. Dalley in 1900.

From the cor. of secs. 15, 16, 21 and 22.

S.  $89^{\circ} 34'$  W., bet. secs. 16 and 21.

Over cultivated land by triangulation.

- 0.16 Cement ditch, 5 lks. wide, 2 ft. deep, drains S.
- 10.00 Leave cultivated land, enter dense willows and tamarack undergrowth.
- 20.00 Telephone line, bears nearly N. and S.
- 22.00 Santa Clara River, 30 lks. wide, 2 ft. deep, flows S.  $30^{\circ}$  E.; asc. about 120 ft. over NE. slope.
- 24.00 Santa Clara-St. George Canal, drains S.  $20^{\circ}$  E.
- 25.00 Leave dense willows and tamarack, enter blackbrush and mesquite undergrowth.
- 40.06 The  $\frac{1}{4}$  sec. cor. of secs. 16 and 21, monumented with a cobblestone, 12x10x8 ins., firmly set at cor. of fences bearing N. and irregularly W., and plainly mkd.  $\frac{1}{4}$  on N. face.

At the cor. point

Set an iron post, 30 ins. long,  $2\frac{1}{2}$  ins. diam., 24 ins. in the ground, with brass cap mkd.

T42S R16W

$\frac{1}{4}$   $\frac{S16}{S21}$

1968

Bury original stone cor. alongside iron post.

S.  $89^{\circ} 27'$  W., beginning new measurement.

Asc. 20 ft. over NE. slope along fence line, bears irregularly W.

- 2.60 Spur, slopes N.; desc. 20 ft. over W. slope.
- 4.30 Draw, drains N.; asc. 80 ft. over E. slope.

Dependent. Resurvey of a Portion of the  
Subdivision, T. 42 S., R. 16 W.

## CHAINS

- 10.30 Spur, slopes N.; desc. 110 ft. over NW. slope.
- 21.10 Draw, drains N. 45° E.; asc. 70 ft. over SE. slope.
- 32.99 The closing cor. of secs. 20 and 21, hereinafter described; asc. 24 ft. over NE. slope.
- 37.90 Spur, slopes N.; desc. 25 ft. along N. slope.
- 40.62 The SW. cor. of sec. 16, monumented with a sandstone, 28x18x12 ins., firmly set in a mound of stone, in fence line, and plainly mkd. 3 notches on S. and 4 on E. edges.
- At the cor. point
- Set an iron post, 30 ins. long, 2½ ins. diam., 6 ins. in the ground to bedrock, and in a mound of stone, 4 ft. base to top, with brass cap mkd.

T42S R16W

S16

S20

1968

Bury original stone cor. in mound of stone along-side iron post.

Land, nearly level farm land E. portion; rolling W. portion.

Soil, sandy clay.

No timber.

Undergrowth, blackbrush and mesquite with willows and tamarack along Santa Clara River.

N. 0° 45' W., bet. secs. 16 and 20.

Over rolling land through blackbrush undergrowth; desc. 5 ft. over gentle N. slope.

- 2.21 The closing cor. of secs. 17 and 20, hereinafter described; thence, bet. secs. 16 and 17, desc. 10 ft. over gentle N. slope.
- 6.00 Spur, slopes N. 45° E.; desc. 65 ft. over NW. slope.
- 12.65 Draw, drains N. 45° E.; asc. 20 ft. over SE. slope.
- 16.65 Spur, slopes E.; desc. 120 ft. over N. slope.
- 35.57 Fence, bears irregularly N. 20° E. and S. 20° W.
- 36.05 Farm road, bears N. 20° E. and S. 20° W.
- 36.50 Fence, parallel to farm road; enter cultivated land.
- 40.17 Point for the ½ sec. cor. of secs. 16 and 17, monumented with an iron post, 1 in. diam., 18 ins. above ground, mkd.

Land, river bottom and rolling bench land.

Soil, clay loam.

No timber.

Undergrowth, shadscale and blackbrush, with willows and tamarack and mesquite along Santa Clara River.

#### General Description

The town of St. George is located in the eastern portion of sections 24 and 25. The town of Santa Clara is located in portions of sections 16 and 17 and the town of Ivins is located in portions of sections 5 and 6.

The area is mostly rolling bench land covered with black brush, shadscale and mesquite undergrowth. The only timber, other than shade trees in the towns, is scattered cottonwood along the Santa Clara River. Soil on the north side of the Santa Clara River consists mostly of sandy loam while that on the south side of the river is mostly clay. The area is drained toward the Santa Clara River, which enters the township in the southwest corner of section 7 and flows southeasterly through the township, leaving in section 36. There is a small stream of water in City Creek which enters the township in section 13 and flows southwesterly through sections 13, 23, 24, 22 and 27 to the Santa Clara River. Several small springs

Dependent Resurvey of a Portion of the  
Subdivision, T. 42 S., R. 16 W.

CHAINS

or seeps were noted in the northeast portion of the township. U. S. Highway No. 91 enters the township in section 25 and bears northwesterly, leaving in section 6. The elevation varies from 2,600 ft. along the Santa Clara River to 3,800 ft. above sea level on the higher benches or mesas. Most of the land along the Santa Clara River is under cultivation, and the higher benches are used for grazing.

# CERTIFICATE OF SURVEY

I, Glen B. Hatch, HEREBY CERTIFY upon honor that,  
in pursuance of special instructions bearing date of the 7 day of December, 19 67,  
I have dependently resurveyed the north and west boundaries and a portion of  
the south and east boundaries and a portion of the subdivisional lines of  
Township 42 South, Range 16 West

of the Salt Lake Meridian, in the State of Utah, which  
are represented in the foregoing field notes as having been executed by me and under my direction;  
and that said survey has been made in strict conformity with said special instructions, the Manual  
of Instructions for the Survey of the Public Lands of the United States, and in specific manner  
described in the foregoing field notes.

## CHAINS

The following field notes are those of the dependent resurvey of a portion of the subdivision lines, and the survey of a portion of the subdivisional lines of sections 3 and 10, Township 37 South, Range 21 East, Salt Lake Meridian, Utah.

Township 37 South, Range 21 East, of the Salt Lake Meridian, Utah. The boundaries and subdivision lines were surveyed, and a portion of the east boundary was resurveyed by Robert C. Yundt, Cadastral Surveyor, in 1947 through 1951, as shown upon the official plat accepted May 11, 1953.

The survey was executed in accordance with the specifications as set forth in the Manual of Surveying Instructions, 1947, and the special instructions dated April 2, 1908.

The directions of all lines of this survey were determined by direct altitude observation on the sun, and carried forward by normal transit traverse.

The geographic position of the 1/4 sec. cor. of sections 10 and 15, is Latitude  $37^{\circ} 34.7' N.$ , Longitude  $109^{\circ} 35.6' W.$ , as determined from the official township plat accepted May 11, 1953.

The magnetic declination was read at a number of stations throughout the survey, and the average of the several readings was found to be  $14\frac{1}{2}^{\circ}$  East.

## General Description

The land included in this survey is rolling to broken  
sidehills; with a general southerly exposure, and drainage  
toward the Cottonwood Wash.

The soil is principally a light shallow sand to sandy  
clay, with numerous rock outcrops; covered with a scat-  
tered growth of juniper and pinon pine, undergrowth sage-  
brush, greasewood, bitter brush, weeds and grasses.

INTERIOR--PORTLAND, OREGON

# CERTIFICATE OF SURVEY

I, Henry U. Lang

, HEREBY CERTIFY upon honor that,

in pursuance of special instructions bearing date of the 2nd day of April, 1968,

I have dependently resurveyed a portion of the subdivision lines and surveyed a portion of the subdivisional lines of sections 3 and 10 in Township 37 South, Range 21 East

of the Salt Lake Meridian, in the State of Utah, which are represented in the foregoing field notes as having been executed by me and under my direction; and that said survey has been made in strict conformity with said special instructions, the Manual of Instructions for the Survey of the Public Lands of the United States, and in specific manner described in the foregoing field notes.

September 10, 1968

(Date)

*Henry U. Lang*

## CERTIFICATE OF APPROVAL

SUBMITTED FOR APPROVAL

Date SEP 19 1968

BUREAU OF LAND MANAGEMENT,  
Washington, D. C.

The foregoing field notes of the dependent resurvey of a portion of the subdivision lines and the survey of a portion of the subdivisional lines of sections 3 and 10 in Township 37 South, Range 21 East, Salt Lake Meridian, Utah

executed by Henry U. Lang

having been critically examined and found correct, are hereby approved.

FEB 17 1969
